

REACH-Declaration

As manufacturer of pump and metering technology ViscoTec neither produces nor imports chemical substances. In terms of REACH regulation, ViscoTec is a downstream user.

According to our present state of knowledge, the products produced don't contain any components which include substances in a concentration over 0.1% weight by weight, listed in the Candidate List of Substances of Very High Concern (SVHC) issued by the European Chemical Agency (ECHA) .

In accordance with REACH article 33, information from our suppliers will be forwarded immediately, if any substance (>0.1% weight by weight) contained in our products is classified as a Substance of Very High Concern (SVHC).

This certification does not exonerate the user from determining whether the material is suited for the specific application. It is incumbent upon the user to apply for approval for the provided application at a relevant institution and to assure the conformance with legal and regulatory requirements.

For reasons of precaution we advise that we are not responsible for changes in the material (e.g. due to contamination during assembly).
